Power Plants Facing Financial Crisis

*108. SHRI SANTOSH KUMAR SAHU: Will the Minister of ENERGY be pleased to state:

(a) what are the details regarding the power plants in the country facing financial crisis;

(b) which of the power plants including the plants in Orissa are behind schedule; and

(c) what are the rasons therefor and the remedial measures proposed to be taken by Government in this regard?

THE MINISTER OF STATE IN THE DEPARTMENT OF POWER IN THE MINISTRY OF ENERGY (SHRIMATI SUSHILA ROHATGI): (a) to (c) Power projects in the Central sector are not facing a financial crisis. Inadequacy of funds with the State Electricity Boards (SEBs) is one of the reasons for delays in the completion of some of the power projects in the State sector. Information regarding the financial status of individual power

plants is not collected centrally. Statement I indicating the financial position of State Electricity Boards is enclosed. (*See* below)

The main reasons affecting the commissioning schedules of power projects include constraint of funds, delays in supply of equipment, unanticipated geological prolems encountered in hydel projects, changes in the scope of works, delays in acquisition of land and in execution of civil works. This necessitates a revision in the commissioning schedules of the projects. A list of power projects programmed for commissioning in 1985-86 and 1986-87 but were not completed in the respective years, is enclosed at Statement-II. (*See* below)

The Department of Power and the Central Electricity Authority monitor closely the implementation of power projects and extend all posible assistance in their timely completion. Joint Coordination Meetings are held by the CEA with the project authorities and the manufacturers and suppliers of equipments to identify and overcome any constraints. Senior officers of the Department and the CEA visit the projects to assess their progress and to assist in resolving any difficulties in implementation.
